

OMNIGUARD CYBER AND PRIVACY APPLICATION

Applicant: _____

Contact: _____ Telephone: _____

Email: _____ Web Site: _____

Address: _____

Total Revenue for last complete financial year: \$

In order to confirm eligibility for the program, please answer the questions below:

1.	Do you have written policies and procedures in place covering compliance with local and Federal privacy regulations?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
2.	Do you have a written IT security policy in place that governs the handling and storage of sensitive information within your organization?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
3.	Do you have anti-virus software installed and enabled on all desktops and servers (excluding database servers) and is it updated on a regular basis?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
4.	Do you have firewalls installed on all external gateways?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
5.	Do you take regular back-ups (at least weekly) of all critical data?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
6.	Do you utilize encryption on all devices in your office including laptops, USB devices, etc.?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
7.	Have you suffered any claim or loss or any form of privacy breach in the last five years, in relation to the risks that this proposal relates to, after full enquiry?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
8.	Are you aware of any circumstances or complaints against you in relation to data protection or security, or any actual or potential security violations or security breaches either currently or in the past five years?	<input type="checkbox"/> Yes	<input type="checkbox"/> No

If you have answered in only the shaded boxes, you are eligible for the program. If you answered in any of the unshaded boxes, you may still be eligible for the program, but please use the box below to elaborate and give any mitigating comments.

COVER	LIMITS (Check Requested Option)	
	Deductible: \$2,500 per claim	
	<input type="checkbox"/> Option 1	<input type="checkbox"/> Option 2
System Damages & Business Interruption	\$500,000	\$1,000,000
Breach Notification	\$150,000	\$250,000
Cyber & Privacy Liability	\$500,000	\$1,000,000
Media Liability	\$500,000	\$1,000,000
Regulatory Privacy Actions	\$500,000	\$1,000,000

To complete your application, please sign and date this form in the box below:

I / we declare that after proper enquiry the statements and particulars given above are true and that I / we have not mis- stated or suppressed any material fact.

I / we agree that this Application Form, together with any other material information supplied by me / us shall form the basis of any contract of insurance affected thereon.

I / we undertake to inform Underwriters of any material alteration to these facts occurring before completion of the contract.

Position: Date:

CYBER, PRIVACY COVER FOR INSURANCE AND TITLE AGENTS

WHO'S IT FOR?

Insurance agents and brokers
Title and Escrow agents

WHAT DOES IT COVER?

Cyber liability, Privacy liability, System damage, System business interruption, Consequential reputational harm, Regulatory actions and investigations, The policy holder's privacy breach notification costs, Third party privacy breach notification costs, Cyber-crime, Multimedia liability, Advertising injury, Technology errors and omissions, Court attendance costs and Crisis communication costs

WHAT ARE THE LIMITS, DEDUCTIBLES AND REVENUE THRESHHOLD

Professional Liability Limit:	\$500,000 and \$1M options
Maximum Revenue:	Unlimited
Minimum Deductible:	\$2,500

WHY PURCHASE CPM?

- CPM is not simply an amended professional liability policy, instead it is a policy designed specifically for the wide range of cyber, privacy and media risks faced by all companies in today's electronic trading environment.
- CPM has no retroactive date meaning there is no restriction on when the event which gave rise to the liabilities occurred.
- the CPM policy features innovative system business interruption cover which not only covers the cost of lost revenue during system downtime but also covers the loss of future revenue due to consequential reputational harm.
- Cyber-crime in all its guises is covered, including identity theft, telephone hacking, and cyber threats and extortion.
- Not only are the policy holder's privacy breach notification costs covered, but also third party notification costs for which the policy holder is responsible.

10 REASONS

to buy cyber liability insurance

1

Complying with breach notification laws costs time and money

Breach notification laws exist in 46 states across the US. Even if you are lucky enough to be in one of the states that has not yet enacted a law, the chances are you will still fall foul of another state's rules or one of the emerging federal laws. These generally require businesses that lose sensitive personal data to provide written notification to those individuals that were potentially affected. Notices need to be drafted by appropriately qualified lawyers, printed and sent out by physical mail. Expensive computer forensics are generally required to identify the source and nature of the loss. Affected individuals often demand credit monitoring services or an equivalent in order to minimise the risk of identity theft. All of this can be exceptionally expensive and even the smallest breach can cost several hundred thousand dollars to manage. Cyber policies not only provide the financial resources to pay for these breaches but can also provide access to specialist breach response resources to help you manage and contain the incident.

2

Third party data is valuable and you can be held liable if you lose it

We all hold more data than ever before and often this data belongs to our customers and suppliers. Non-disclosure agreements and commercial contracts often contain warranties and indemnities in relation to the security of this data that can trigger expensive damages claims in the event that you experience a breach. Increasingly, consumers are also seeking legal redress in the event that a business loses their data. Regulatory actions are also on the rise with significant fines now in place for businesses that place sensitive personal information or medical data at risk.

3

Data is one of your most important assets yet it is not covered by standard property insurance policies

Most businesses would agree that data or information is one of their most important assets. It is almost certainly worth many times more than the physical equipment that it is stored upon. Yet most business owners do not realise that a standard property policy would not respond in the event that this data is damaged or destroyed. A cyber policy can provide comprehensive cover for data restoration and rectification in the event of a loss no matter how it was caused and up to the full policy limits.

4

Systems are critical to operating your day to day business but their downtime is not covered by standard business interruption insurance

All businesses rely on systems to conduct their core business, from electronic point of sales software to hotel room reservation systems. In the event that a hack attack, computer virus or malicious employee brings down these systems, a traditional business interruption policy would not respond. Cyber insurance can provide cover for loss of profits associated with a systems outage that is caused by a "non physical" peril like a computer virus or denial of service attack.

5

Cyber crime is the fastest growing crime in the world, but most attacks are not covered by standard property or crime insurance policies

New crimes are emerging every day. The internet means that your business is now exposed to the world's criminals and is vulnerable to attack at any time of the day or night. Phishing scams, identity theft, and telephone hacking are all crimes that traditional insurance policies do not address. Cyber insurance can provide comprehensive crime cover for a wide range of electronic perils that are increasingly threatening the financial resources of today's businesses.

6

Retailers face severe penalties if they lose credit card data

Global credit card crime is worth over \$7.5bn* and increasingly this risk is being transferred to the retailers that lose the data. Under merchant service agreements, compromised retailers can be held liable for forensic investigation costs, credit card reissuance costs and the actual fraud conducted on stolen cards. These losses can run into hundreds of thousands of dollars for even a small retailer. Cyber insurance can help protect against all of these costs.

7

Your reputation is your number one asset, so why not insure it?

Any business lives and dies by its reputation. Although there are certain reputational risks that can't be insured, you can insure your reputation in the event of a security breach. When your systems have been compromised, you run a risk of losing the trust of your loyal customers which can harm your business far more than the immediate financial loss. Cyber insurance can not only help pay for the costs of engaging a PR firm to help restore this, but also for the loss of future sales that arise as a direct result of customers switching to your competitors.

8

Social media usage is at an all-time high and claims are on the rise

Social media is the fastest growing entertainment channel in the world. Information is exchanged at lightening speed and exposed to the world. But often there is little control exercised over what is said and how it is presented and this can give rise to liability for businesses who are responsible for the actions of their employees on sites such as LinkedIn, Twitter and Facebook. Cyber insurance can help provide cover for claims arising from leaked information, defamatory statements or copyright infringement.

9

Portable devices increases the risk of a loss or theft

The advent of portable devices and the ability to work away from the office has made life a lot easier for many of us. However, this new style of working also means that important and confidential data can be stolen or lost much more easily. A laptop left on a bus, an iPad stolen in a restaurant, or a USB stick going missing are all good examples. In addition, the devices themselves are being targeted with a growing number of viruses being built just for them. Cyber insurance can help cover the costs associated with a data breach should a portable device be lost, stolen or fall victim to a virus.

10

It's not just big businesses being targeted by hackers, but lots of small ones too

Whilst the large-scale hack attacks on the news often involve big companies, small companies are also at risk and often don't have the financial resources to get back on track after a hacking attack or other kind of data loss. In fact, over a third of global targeted attacks were aimed at businesses with less than 250 employees[†]. Cyber attacks are quickly becoming one of the greatest risks faced by smaller companies, making cyber liability insurance a must. It can help protect smaller companies against the potentially crippling financial effects of a privacy breach or data loss.
